SLIM Lighting system for helidecks

The SLIM light introduce the latest generation of lighting for helidecks. The modular concept is based on a sealed lamp with a wide illuminated surface and an extremely thin shape. The embedded LED element is completely protected by moisture and operator handling . The same sealed lamp is replaceable and can be used for different lighting purposes on different bases. SLIM-S for flush installation on the helideck with minimal openings of the surface and SLIM-E for deck or bulkhead and lamp series installations.

Unit functions include: Deck Edge, Hargar Contour and Extended Lineup lights.

MIL-S-901 shock qualified

Technical characteristics

- Electrical power: 5 W
- Light color: all aviation (green, yellow, red)
- NVG compatible with complementary IR LED
- Extremely low RCS
- Enclosure: Watertight IP 67 factory sealed
- Dimensions (LED lamp) : 380x100x8 mm
